

## 2026 Pharmacy Informatics Internship Program

The goal of the Pharmacy Clinical Informatics Internship Program is to develop future pharmacy leaders in informatics through exposure to population health and clinical informatics principles through concepts such as data model design, clinical workflows, and interoperability. Working directly with pharmacists and clinical leaders, the Interns will learn how clinical informatics principles are used to maximize health care resources, patient care outcomes, and implementations. The student pharmacists will be selected for this internship in pharmacy informatics. This opportunity is open to ACPE-accredited school or college with an **anticipated graduation of 2027 or 2028. This is full time position 40 hours per week.** The student pharmacists selected will gain experience through a curriculum designed by Harvard Medical School faculty members at the Division of Clinical Informatics (DCI) at Beth Israel Deaconess Medical Center and Pfizer Clinical Informatics, Medical Outcomes & Analytics specialists (CI). The student pharmacists will engage in clinical informatics and pharmacy experiences through participation in the structured **twelve-week** internship program, with additional exposure to population health and advanced research methods. Interns will have access to online learning resources and be mentored for a research project leading to scientific publications. The training offered will be tailored to the students' background and future career objectives. The Interns can be **virtually** located anywhere in the United States. Internship **runs June 1, 2026 to August 21, 2026 (start date flexible).** For more information, contact Dr. Yuri Quintana, Chief of Division of Clinical Informatics, [yquintan@bidmc.harvard.edu](mailto:yquintan@bidmc.harvard.edu). **APPLICATION DEADLINE April 30, 2026!**

Read eligibility conditions and apply at <https://dci.bidmc.org/2025-pharm-internship>

### Internship Details

The interns will be assigned a Preceptor to guide and tailor the learning encounters developed by faculty at DCI and Pfizer CI specialists. The interns will work closely with their Preceptor to conceptualize, develop, and complete a project on improving the quality of patient care through informatics. The interns are eligible to receive a modest financial stipend.

This program is made possible through generous support from Pfizer Inc.
